A new app created for families with special needs is here.

Every parent of a child with special needs carries questions about the future: Who will step in? How will everything stay organized? Will my child be cared for the way I care for them?

A Special Needs Support was built to help solve those challenges.

This powerful new app gives families one secure place to organize critical information, guide their support team, and prepare for the day when others may need to step in. It's about more than organization. It's about protection, continuity, and peace of mind.
